

DuraPrint®

Laser Printable Patient ID System
for Adult Patients

POSITIVE ID. POSITIVE OUTCOMES.™

DuraPrint® Laser Printable Patient ID System for Adult Patients

DuraPrint® is a revolutionary Laser Printable ID System featuring sheeted wristbands and labels. It features a patented design and advanced material that protects patient data and bar codes without the need for a laminate overlay, which can obstruct bar code scanning.

DuraPrint provides positive patient identification, while preventing medical errors for maximum patient safety. Through its quick and easy application, DuraPrint streamlines steps in the admissions process to reduce wait time and increase work flow efficiency. Most hospitals agree that it's the safest, simplest, and most reliable solution in Healthcare today!

1. DuraPrint Features No Laminate Overlay!

Traditional laminate overlay wristbands may cause wrinkles and folds, which can obstruct bar code scanning and can also cause water and chemicals to become trapped underneath the laminate overlay.

wrinkles & folds that obstruct scanning

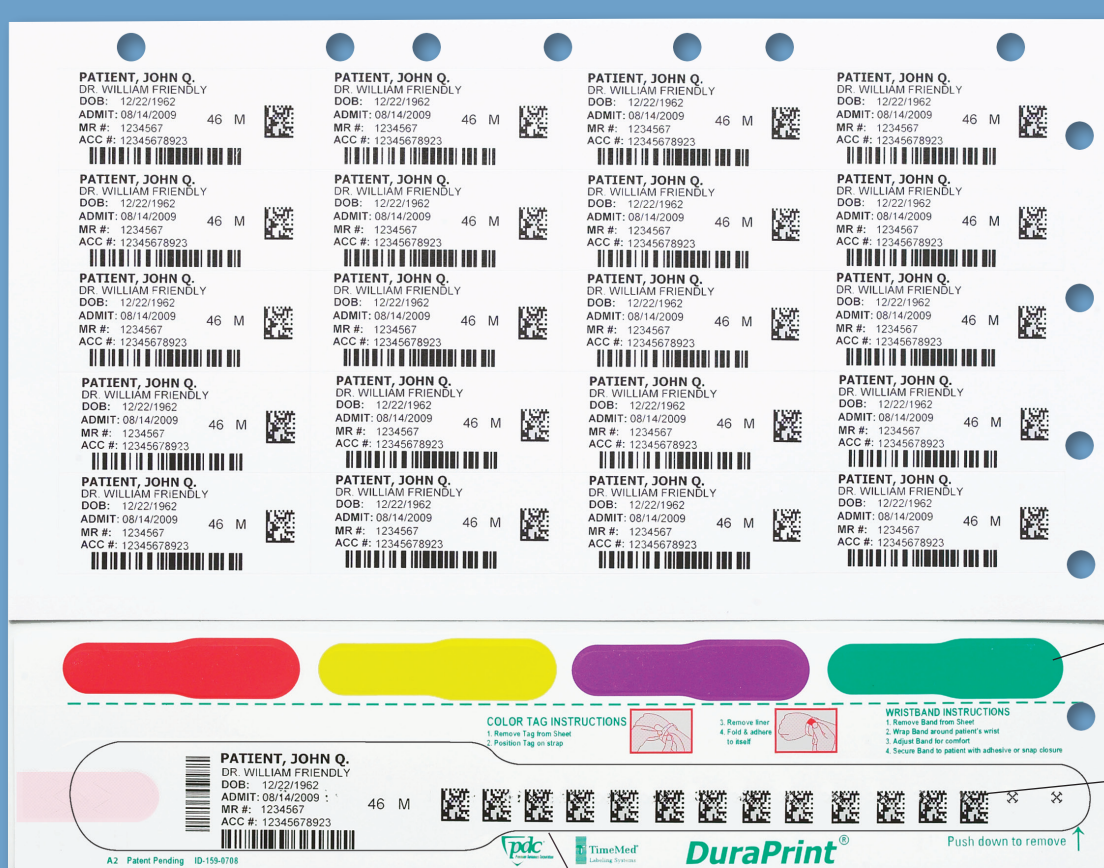

water or chemicals trapped below overlay

DuraPrint's patented design with advanced material protects patient data and bar codes without the need for a laminate overlay, which saves hospital staff time and increases work flow efficiency.

2. Jam-Free™ Printing! Specially designed material lies flat when exposed to high humidity, ensuring smooth and successful printer feedability—every time. If you're already using a comparable laser printable ID product, you can **easily switch to DuraPrint without IT reformatting.**

3. Quick and Easy Application! Simply remove the wristband from the sheet and apply to the patient's wrist using the pink alignment tab. Secure it with the tamper-evident closure.

4. Tamper-evident Adhesive Closure prevents transfer from one patient to another. **Optional snap closure** can be ordered separately to provide an extra measure of security.

5. Scans First Time, Every Time because there is no laminate overlay film, which can wrinkle and crease to obstruct scanning.

6. Moisture-resistant. Specially designed material **resists moisture, alcohol, and hand sanitizer** to preserve patient data and bar codes. **Latex-Free.**

7. Four Color Code Alert Tags warn of special precautions (ALLERGY, DNR, FALL RISK, etc.). New design without labels (9335-00-PDM) is also available. Also available without color coded tag (9325-11-PDR).

8. Increased Printing Area Allows Printing Along the Entire Length of the Band. This helps staff scan the patient's bar code without turning the wristband or interfering with the patient.

9. Extra Smooth, Soft Material and Contoured Edges Will Not Damage Skin, unlike the edges of some other wristbands which may scrape or scratch skin.

See Why Industry Experts Choose DuraPrint®

www.pdcorp.com/duraprint

After being tested against a laminate overlay wristband, see why DuraPrint was chosen by Rush-Copley Medical Center (Aurora, IL) for superior convenience and patient safety.

“ We needed a bar code wristband system that was safe and comfortable for the patient, durable for the clinician, and easily scannable by our readers. PDC’s DuraPrint® Bar Code Wristband System was a perfect match for everything we were looking for. The product is a big part of the success we’ve achieved in all of our patient safety initiatives.

Our team wore DuraPrint wristbands for as long as a week, and found them to be comfortable, legible, and scannable for the duration of testing. It was also the most durable. While the other (laminated) bands began to fall apart quickly, DuraPrint held up to the test of time. ”
